

English

Polish, Czech, German, Ukrainian, Spanish · 2024-09-01 – 2026-08-31 · wikipedia · fetched 2026-09-27

Conclusion

Interest in the Wikipedia article about the English language is falling in four of five editions: Polish -10%, Czech -11%, Ukrainian -14% and Spanish -10% year over year, while German is stable at 0%. Ukrainian readers look at the topic most, 119 views per million. German trust is low because the verdict weakens under alternative calculations.

Recommendation

Research the Spanish, Ukrainian and Polish audiences next, as the ranking suggests. Spanish-language readers are spread across ES 32%, MX 17% and AR 12%, so plan that market by country, not by language.

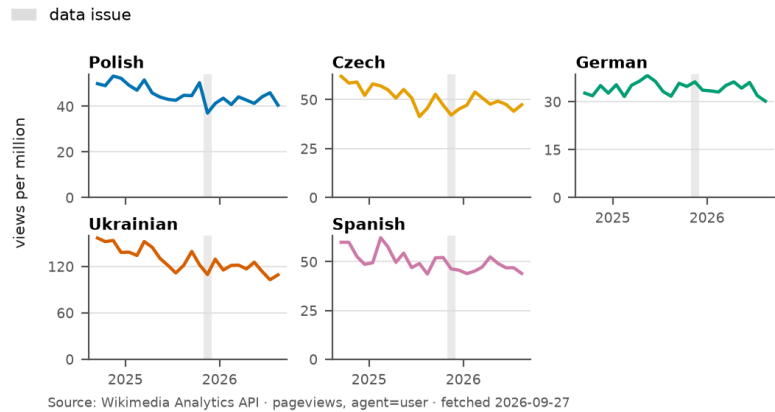

What to check next

Validate willingness to pay with surveys or landing pages in these markets before localising.

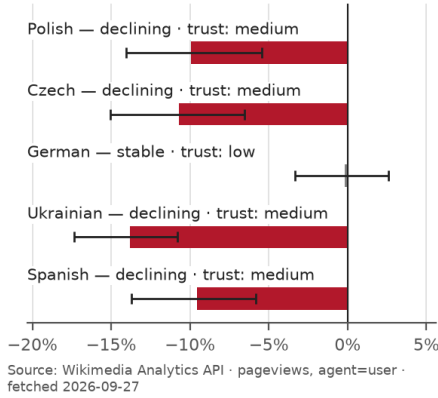

Languages at a glance

Language	Views/mln	12-month change (90% CI)	Verdict	Trust	Seasonality	Top countries	Article
Polish	43.0	-10% (-14...-5%)	declining	medium	weak	PL 87%, US 2%, DE 2%	regular article
Czech	47.9	-11% (-15...-7%)	declining	medium	moderate	CZ 83%, SK 5%, US 3%	regular article
German	34.2	0% (-3...+3%)	stable	low	moderate	DE 77%, AT 8%, CH 5%	regular article
Ukrainian	119	-14% (-17...-11%)	declining	medium	weak	UA 74%, US 5%, PL 4%	regular article
Spanish	47.7	-10% (-14...-6%)	declining	medium	weak	ES 32%, MX 17%, AR 12%	regular article

Share of all views in the edition, per million (monthly)

Last 12 months vs the 12 before (90% CI)

Why this trust level

Polish, Czech, Ukrainian, Spanish: a known Wikimedia data problem overlaps the compared years

German: the verdict weakens under alternative calculations; a known Wikimedia data problem overlaps the compared years

Assumptions and limitations

- Pageviews show curiosity, not willingness to pay: treat the results as leads for further validation.
- A language edition is not a country: its readers live in several countries, and one country reads several editions.
- 2025-11-01...2025-11-30: Undetected bots inflated 'human' pageviews, most strongly in smaller languages; this month was never corrected.
- 2025-03-20...2025-08-31: Undetected bot traffic in this period was removed retroactively in Oct 2025 (history was rewritten).
- 2025-05-11...2025-07-23: About 2% of pageviews from Europe and Asia were lost.
- 2025-12-01...2026-03-31: Bot traffic in this period was removed retroactively in May 2026 (history was rewritten).

Sources and method

Metric: share of all views of the language edition (per million). Change: last 52 weeks vs the 52 weeks before, 90% block-bootstrap interval. Trend: Theil-Sen with a Mann-Kendall test. Spikes: Hampel filter. Human traffic only. Requests: agent=user, access=all-access; Pageviews API (per-article, aggregate, top-by-country), daily country-page dataset, Wikidata API. 5 article(s) and 2 redirect(s) counted. Data: Wikimedia Analytics API and Wikidata (CC0), fetched 2026-09-27. Full version: report.md. Wikidata: Q1860.
